# Lab2 : JADE introduction

## Exercise 1 :

1/ Create an agent in JADE  platform that displays the message « Hello world » followed by its name.
2/ Give the steps for launching one agent.
3/ Give the steps for launching two agents.

## Exercise 2 : Passing arguments :

1/ Develop a Jade agent class, which receives data as arguments and displays it.
2/ Give the steps for launching an agent with passing arguments.
3/ Give the steps for launching two agents with passing arguments.

## Exercise 3 :

Repeat exercise 1 to launch the agent by program. (Java)

## Exercise 4 :

Repeat exercise 2 to launch the agent programmatically. Launch two agents, each with different input data (arguments).
